Rapid Strep A Antigen Test

AVAILABLE IN
25 TEST PACK

Group A Streptococcus Prevalence

10-15K

The CDC estimates that the United States sees 10,000–15,000 cases of invasive group A strep each year, resulting in over 2,000 deaths.

iGAS infections account for 1.8 million cases worldwide, with a mortality rate of up to 20%.

Around 5–15% of school-aged children are colonized with group A strep but not infected, and there's no way to differentiate between carriers and those who are infected.

Who is it for?

- Pediatric patients exhibiting symptoms like sore throat, fever, and swollen lymph nodes, to diagnose or rule out strep throat.
- Adults experiencing prolonged or severe sore throat symptoms to determine if antibiotics are necessary.
- Those with compromised immune systems who need swift diagnosis and treatment to prevent further complications.

Test Type	Rapid Antigen for the detection of Group A Streptococcus (POC)
Sample Type	Throat Swab
Time to Result	5 minutes
Accuracy	Sensitivity 97.1%, Specificity 99.4%
Kit Contents	25 Test Strips, 25 Sterile swabs, 25 Disposable extraction tubes, 1 Reagent A, 1 Reagent B, 1 Positive Control, 1 Negative Control, 1 Instructions for Use
Strep A Symptoms	Fever, chills, and aching body, red and swollen tonsils, pain when swallowing, pus on tonsils, and tiny red spots on the roof of the mouth
FDA 510(k)?	Yes
